The Boating Industry's Answer

To Cloud Computing

NSS now offers a full featured cloud computing solution for all its marine-based software programs. Access to your line of NSS business software and applications from any device and any web browser with fast, secure and reliable service. You can also bring your other business applications to the NSS Cloud, e.g., QuickBooks, MS Office, as well as other standard business apps, with hassle-free printing. All provided at a fraction of the cost most cloud computing software companies charge.

Datacenter
Our Datacenter is in a hurricane resistant, Class-A office building in Florida with a secondary auto backup facility located in Indiana. Any disruption in service is automatically and seamlessly switched to our backup site to provide uninterrupted service. Multiple servers are onsite to always provide you with the fastest connection possible.

Backup Data Storage
Infinitely expandable offsite storage space for backing of your data. All data is encrypted and backed up daily at midnight. The space recommended to be used as offsite storage, disaster recovery of documents, are based on your company's requirements.

24/7 Facility Access
You get peace of mind with the comfort of knowing you can access the equipment 24/7/365.

Industry Standard Conditioned Air
A/C is supplied by multiple separate and independent Liebert "System 3" glycol units.

Monitored Fire Suppression
Protected with FM-200 fire suppression. Fully automatic and is remotely monitored twenty-four hours a day.

Multiple Power Circuits
Equipped with several levels of electrical power redundancy and conditioning. Multiple separate Liebert Power Distribution Units combined with multiple separate and independent Liebert UPS units. All to ensure data security.
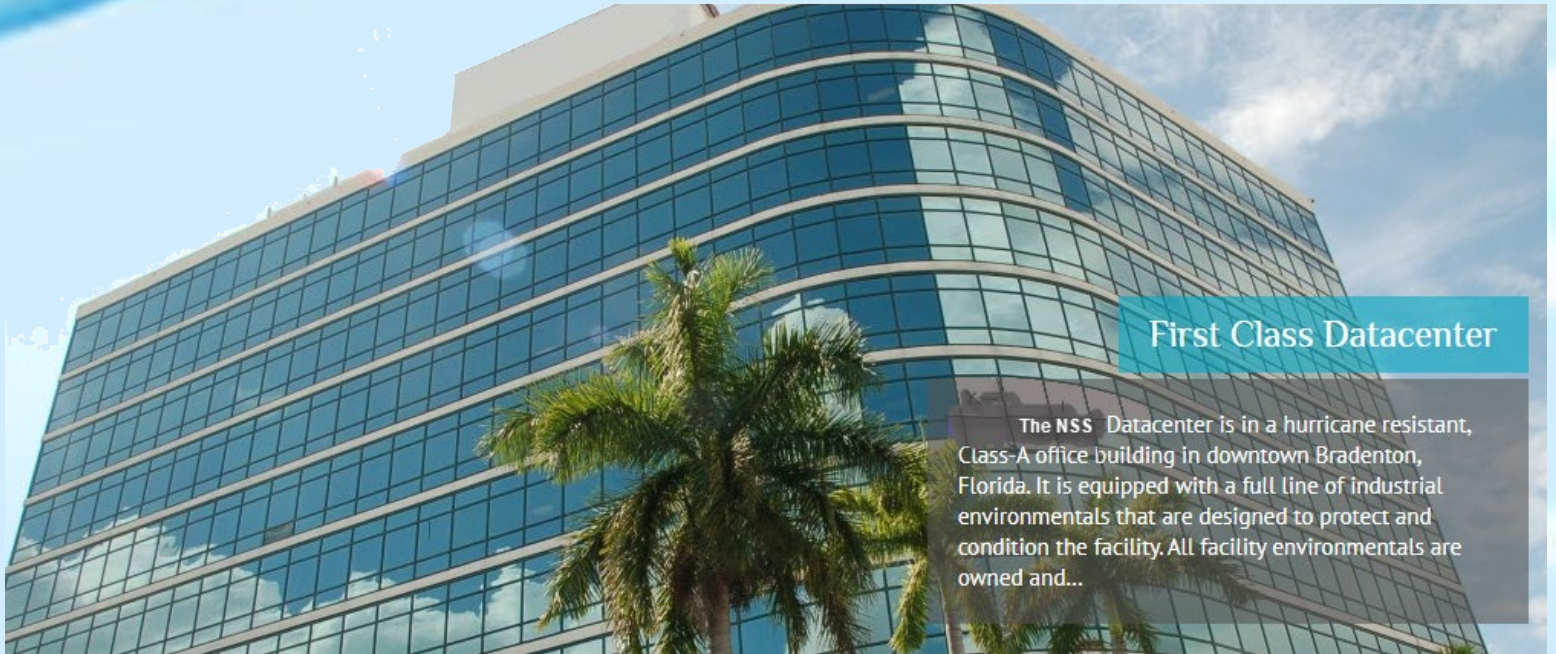

Backup Generator Systems
The generator systems are capable of sustaining a full data center load for five days on a single fuel tank.

Maintenance and Support
All environment components are under maintenance contracts with manufacturer certified companies.

THE FACILITY

## First Class Datacenter

The **NSS** Datacenter is in a hurricane resistant, Class-A office building in downtown Bradenton, Florida. It is equipped with a full line of industrial environmentals that are designed to protect and condition the facility. All facility environmentals are owned and...

...managed by the datacenter and are in place and dedicated for the exclusive use of our clients. These environmental are not shared with, nor do they support any office space. What this means for our clients is peace of mind.

SECURITY

File and Storage Services

Backup Data Storage: Infinitely expandable offsite storage space for backing of your data. All data is encrypted and backed up daily at midnight. This space recommended to be used as offsite storage, disaster recovery of documents, templates,

We adhere to strict privacy policies and sophisticaed security measure that mean keeping data in the Cloud is actually more sefcure than traditional on-premise. Hosting data in our purpose-built data centers not only provides physical security, it also gives businesses complete controla over who can access data, when and how. Hosted desktop and file server sholutions are delievered using industry standard encryption methods, ahnd allow securely hosted, prermission-based data control.

If you are interested in Cloud Computing it's very simple
